

COMPUTERIZED CONTROLLERS

Platinum

Poultry House Control Computer

Plus

Rotem's **Platinum^{Plus}** Environmental controller sets new standards in the poultry industry. The large LCD display makes it absolutely user friendly and easy to use. The **Platinum^{Plus}** includes two ventilation programs: the industry's staged "Standard Ventilation" program, and Rotem's Advanced and Dynamic "Precision Ventilation."

The **Platinum^{Plus}** is suitable for growers who are seeking a First Class controller with minimal programming, and for growers who would like precision power and to be involved in every programming detail.

The **Platinum^{Plus}** enables the grower to control Wind Chill, transitional ventilation details, and precisely adjust air flow in minimum ventilation. The **Platinum^{Plus}** is always there to help the grower make the right decision in real time. It can handle Power, Natural, Transitional and Tunnel ventilation in the most optimal way.

Features:

- Large LCD Graphic Display, 40x16 characters.
- On Screen Help and Graphs.
- Data Plug for Easy Data Transfer.
- Large Friendly Numeric Keypad.
- Up to 40 Heavy Duty Relays (1 HP).
- Smart On/Off/Auto Override Switches.
- Battery Backup Option.
- Coordinated Digital/Analog Static Pressure Control.
- Eight Independent Heat Zones.
- Precision Fogger and Cool Cell Cooling Systems.
- Feed Management with Integrated Overflow Alarm and Shutoff.
- Detailed Alarm and Event log.
- Complete Remote Communications with Real Time Visual Outlook.
