

COMPUTERIZED CONTROLLERS

RPBS-1

Portable Bird Scale

The RPBS-1 portable bird scale operates on a rechargeable battery, and is absolutely portable and user friendly.

The system is suitable for use on broiler and breeder farms. Use it at the farm, grower, company and integrator levels to monitor flock growth and health, and to determine the best marketing date.

The scale records the number of birds weighed, their average weight, standard deviation, CV and uniformity. All data for up to 10,000 birds is stored in non-volatile memory identified by farm, flock, house and growth day. You can continuously, over days, weeks and months weigh birds in a large number of houses and keep a large data base. At your convenience you can download the data to a PC for detailed analysis.

The RPBS-1 retains data even if the rechargeable battery is low in its non-volatile memory. The system automatically turns off if no operation has been performed for 5 minutes to prolong battery life.

Features:

- Weighings up to 10 Kg. (22Lb.)
30 Kg. Optional
- Accuracy: (1 gr.)
- Five digit display.
- Display: • Average Weight
• Number of Weights
• Standard Deviation
• Uniformity
• CV
- Can operate 10 hours on battery.
- Data display in LB or Kg. Low battery indicator.
- PC Communication for Windows.

The system connects to a serial printer or a PC, and includes Rotem software for Windows, to collect and print data, graphs and reports.
