

RSW-2

Silo Weighing System

The Rotem RSW-2 weighing system consists of a Controller, Load Cells and required Electronic Hardware. The unique RSW-2 program automatically registers feed deliveries with quantity, date and time stamp. The controller also collects, displays and saves water consumption, feed consumption, Live Animal Weight and Feed Conversion data every growth day during the growth cycle.

The RSW-2 activates up to two delivery augers, and your feeders, lights and alarms. It can weigh the feed in two independent silos, or optionally one silo and one live bird scale.

You can obtain the RSW-2 with programs suitable for Breeders or for Broilers. The Breeder program distinguishes between male and female feed allocations providing you complete independent control. The RSW-2 can control up to ten feeding cycles per day, and can distribute different quantities of feed to each feed line, up to 8 lines for female and 8 lines for male.

Features:

- LCD Display 2 X 20 Characters
- Feeding Curve
- Restricted Feeding
- Automatic Registration of Feed Deliveries
- Skip A Day
- 10 Possible Feed Times Each Day
- Female & Male Programs
- 10 Possible Lighting Times Each Day
- Operating Mode, Auto/Stop
- Feed Consumption
- Water Consumption
- Bird Weights
- Feed Conversion
- Mortality
- Alarms
- PC Communication for Windows
